## PROFILE

IE is a leading manufacturer and global supplier of automotive components since 1959, our automotive components range includes Metal to Rubber Bonded Components, Steering & Suspension Parts. Engineered to meet and exceed the rigorous standards of the automotive industry, the company has two state-of-art manufacturing plants located in the NCR (National Capital Region), Delhi in India, which are ISO/TS 16949 certified and engaged in development of parts for primary and secondary market as per the customer designs and specifications. Our current product range includes more than 2000 part numbers developed for various steering, suspension and other automotive application.

Currently we are making parts for mostly all American and Japanese heavy commercial vehicles, cars, and light commercial vehicles, However we can make any type of components in Steering & Suspension Parts and Rubber (Whether in EPDM, Natural or Synthetic) according to customer specifications.

## WE BELIEVE

At IE, we believe quality & value are not mutually exclusive concepts. In fact we know both quality and value in automotive technology can be mutually elevated by embracing one overarching strategy: strive for fully integrated solution and that too from a single capable source.

Our engineering capabilities & state of art manufacturing infrastructure for automotive components deliver quality & value. Our analysis and understanding for automotive business not only mean we can provide customised solutions, they also enable us to develop components that are optimized to deliver the required performance, and to deliver it in a very cost-effective way.

So whether our customer choose total solution or individual components from our vast range of product portfolio, they can depend on the highest technology standards at the most competitive price possible.

# QUALITY

Quality never happens by chance. It is always a result of planned and sustained effort. In order to meet global customer quality standards it becomes necessary to maintain high standard of product & process quality. IE is committed to an ongoing quality improvement philosophy with our quality control system following international standards. Our plant has high precision equipment procured from reputed manufacturers world wide to precisely help in meeting this goal. We at IE can proudly claim that a stringent quality control system is followed for all products at various stages so that we are able to ensure that the final product that the final product

that reaches the customer is of high quality & assures satisfaction of the performance standards of the performance standards demanded by customers, our main motto is "Zero defect supplies"

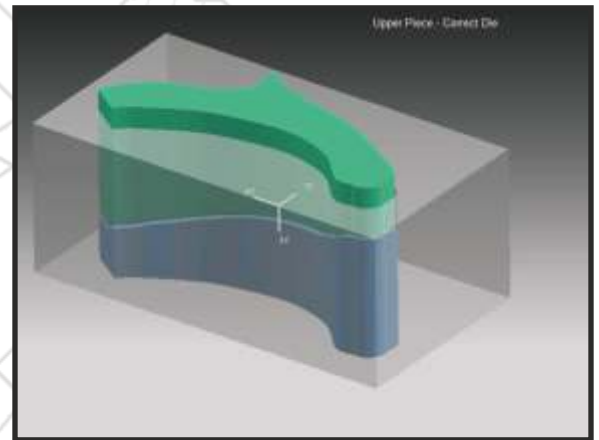

## TECHNOLOGY

The focus at the IE is on collaborative designing with the OEMs. The company has the capability to improvise existing products as well as offer cost-effective solutions for products already available in the market. With strong focus on R&D, the company has been constantly evaluating and employing emerging technologies to benefit its customers.

IE provides its customers with all the facilities under one roof, be it design and development, prototyping, testing, validation and quality, or manufacturing the final product. The forte' of the company is in design and development of new products with in no time because of the new technology and less infrastructure cost.

## INFRASTRUCTURE

## DESIGN & ENGINEERING

The reliability and dependability standards for automotive design & engineering technology are very rigorous. The technology needs to work every time, all the time for an automotive components life.

At IE, we live with the thrive on those standards every day, we have complete design centre in-house with top-of-the-line CAD-CAM software with experienced and technically competent product designers and well-developed facilities to create the latest desired designs for the customers. These software are extensively used for 3D styling and to check the surface, details, assembly, mating parts and seamless movements.

As a leader in our product range, a passion for perfection has become a cornerstone of our culture. It's how we live, how we work and how we excel.

### ENVIRONMENT & SAFETY

IE has always been committed to developing products and manufacturing processes that combine technological innovation with respect for the environment. We are concerned about environmental impacts, are therefore committed to the environment & safety.
